

UTOPIAVERSE

Anything you should know

The RULES

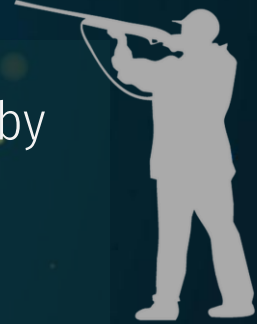

The important thing to do is that we have to work by developing a place / forest / village etc

How do you develop it?

you have to work! Yes! You have to work.

WHY??.

Because from the results of the work,
you can sell in the marketplace

WHAT CAN I DO?

01

CUTTING DOWN TREES

You can produce wood

03

HUNTING OR FISHING

Get animal or fish

02

BREAKING ROCKS

You produce stone

04

FARMING

produce vegetables and fruits

OR ANY JOB THAT CAN PRODUCE EVERYONE'S NEEDS

Marketpalce is not privately owned.
**but it's a place to buy and
sell players**

| If you want to build a house, then you need wood. You can look for it in the market place if you can't do the job of chopping the trees yourself

VERY IMPORTANT TO NOTE!

**EVERYONE WILL NOT BE ABLE TO
GET WHAT THEY NEED, SO MUST
WORK TOGETHER AND NEED EACH
OTHER**

So, you can make money selling those necessities

Here is NFT

- For example, if you buy land and make it a garden and plant vegetables or fruits after harvest you sell it in the marketplace and it must be bought

WHY??

- Every human being must fulfill his nutritional needs, not only by eating rice

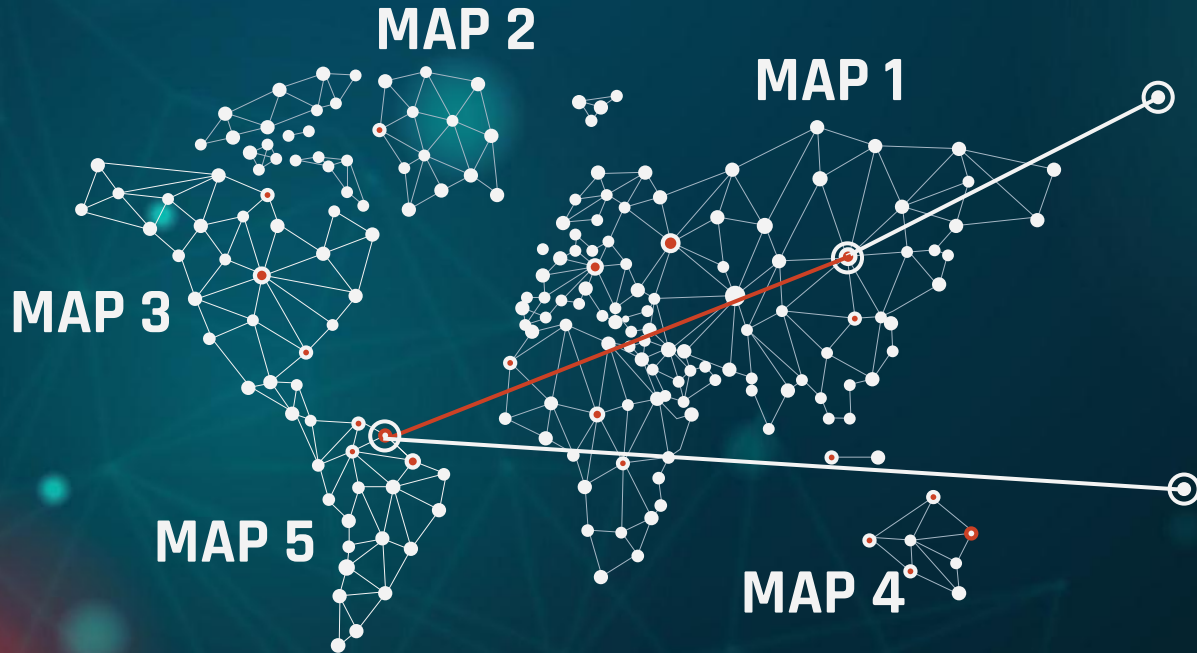

Meet with real friends

If you with your colleagues in the real world want a discussion build a restaurant business in this game

Can our food sell? Of course!
because everyone will buy food from you not to the marketplace

WHY GET PROFIT?

Your place of business

if the user is far away,
you must sell the food
you make every day on
the marketplace

User come from far

a user on map 5 comes to your
restaurant on map 1, then you
must enter / post your food
menu to the market place

TAX

the tax system will be imposed on every human being why ?

because the banking system has penetrated the world of the metaverse, of course there will be regulations in this game

BANK

and banks will also be present in this game REAL but virtual bank

This bank will take care of maybe your loan to build a house or other businesses

If your character dies

then you will lose money, tools (tools) axes, saws etc basically your work tools. but if you have a house you won't lose the house and the land

LOSE

you have to think with your own mind how to be successful?

Normal

Die

sickly

New Life

You can live again, but you become poor if you have no savings and live like a beggar

RICH

Doing work, trying to develop livestock and plantations, etc

Web 3.0

whatever you do will be permanently stored in the blockchain system and can't be reset (except system error)

FAQ

WHAT TOKEN AND SMARTCONTRACT NAME IS USED IN THIS GAME?

I will explain first SMARTCONTRACT

we are not using any SC Network, because we are currently using our own program which we named **SDB926 (SMART DEVICE BLOCK)**.

In the future, friends' DEVICE that will be security for yourself

It means that your DEVICE / DEVICE will be a protector from hacker attacks

If you don't care about your device/device, it's possible, hackers attack from your cellphone/laptop line

Block : Of course we already know, this is a system that is intertwined from one to another, create a chain system, as long as the internet still exists 9 is a number 26 is the letter

So we don't use existing technology, but make our own from the game directly

why in live game ? In the future we will make it even better, and separate it from the game

one example, at this time our WALLET, directly planted in the game, to catch up with the processing time of this PROJECT GAME, if we separate, then it won't match the target's thinking later,

WHAT IS THE NAME OF TOKEN/COIN?

Once again, we don't use TOKEN/COIN but instead use the SCRIPT Algorithm that we bought the name for **\$GOLD**

if You want to call it TOKEN / COIN \$GOLD it doesn't matter..

WHY AND WHY NOT TO USE TOKEN / COIN OUT THERE?

1. Our reason, crypto is a technology that some people might say is very good, but different from our opinion, we don't say bad, but we don't agree, crypto players always loss, back to my question, what do you invest for? if only looking for losses? it's just a short, too long to explain in detail
2. Another reason, if we use one of the coins, whatever it is, even **MOTHER COIN** once, then I guarantee, the user will scream and say **THIS GAME IS RUG PULL!**
3. WHAT is the cause: a lot!
 1. When the user deposits. Prices can change very fluctuate
 2. When the user buys LAND or other tools, if it turns out to be different from expectations then obviously the user will say this game is a **RUG PULL** game
 3. and many more.....

WHAT TECHNOLOGICAL POWER SHOULD I DO?

The reason I use the system now is because

- A. using a gold RATE, which is not so wild up and down
- B. My system has a final price limit (LAST PRICE) where, for example, friends buy land at a price of 200,000, consider 0.023 gr (\$GOLD) for example.
- C. Tomorrow GOLD DOES DOWN, dropping to 100,000 per gram , then your land has no effect on free fall, because i use lock PRICE (stop silent when first buy at brp value)
- D. I use this system, I don't want it, the user feels that we are the losers
- E. Return to the token earlier, if using TOKEN/COIN technology , so the one who will rule is **WHALE / CUKONG**
- F. and again and again.....
